ARKETIPO / SIDE-TABLES

PETRA

designed by Bartoli Design 2013

BASE: Metal, finishes: micaceous brown, titanium or brass.

TOP: mat Emperador marble or sandstone.

ATTENTION: The volume is referred to the height 55,5 cm.

Marble is characterized by porosity and cracking that, during the manufacturing process are filled with special resins or inserts in the same material. After the polishing the surface may present irregularities and natural micro holes, which, however, do not compromise the solidity of the product.

For the correct maintenance of all marble surfaces, it is recommended to use neutral detergents and no degreasers nor corrosive detergents. Acid substances may spoil the polished marble surface. It is also recommended to avoid contact with liquids and acid food and to remove immediately these substances if they accidentally come in contact with the surface.
